

Claims Sort Study

-Fish Oil Supplement-

October 2013

Research Objectives

- ❑ Identify the claims that are found to be most motivating to buy.
- ❑ Determine reasons for finding a particular claim most motivating.
- ❑ Ascertain level of credibility for each claim and reasons for finding it credible and not credible.

Methodology

The sample for Banner Pharmacaps, Inc Fish Oil claims study was randomly drawn from a regional list of Adults 25-64. 400 online interviews were conducted between *October 15, 2013* and *October 18, 2013*

Participants were qualified by:

- Currently use Fish Oil supplements available over-the-counter (OTC), but do not purchase this item online or from specialty retailers
- Primary shopper or key decision maker in diet and supplement products for the household
- 50% Male / 50 % Female
- 25% shop at Sam's Wholesale Club at least once a month
- 25% shop at Walgreens at least once a month
- 25% shop at CVS Drug Store at least once a month
- 25% shop at Walmart at least once a month
- Not employed in sensitive industries: Advertising, Marketing, Pharmaceutical or PR

The Claims

Respondents were also shown several groups of claims and asked to rate them in terms of Purchase Motivation, Believability and Uniqueness.

The claims were grouped as follows:

- Product Benefits For Controlling Fishy Burps (4 claims)
- Product Benefits For Absorption (4)
- Product Features (5)
- Additional Product Benefits (7)
- Product Benefits vs. Mega Red (4)
- Mini Gel Features (3—only asked about Purchase Motivation)

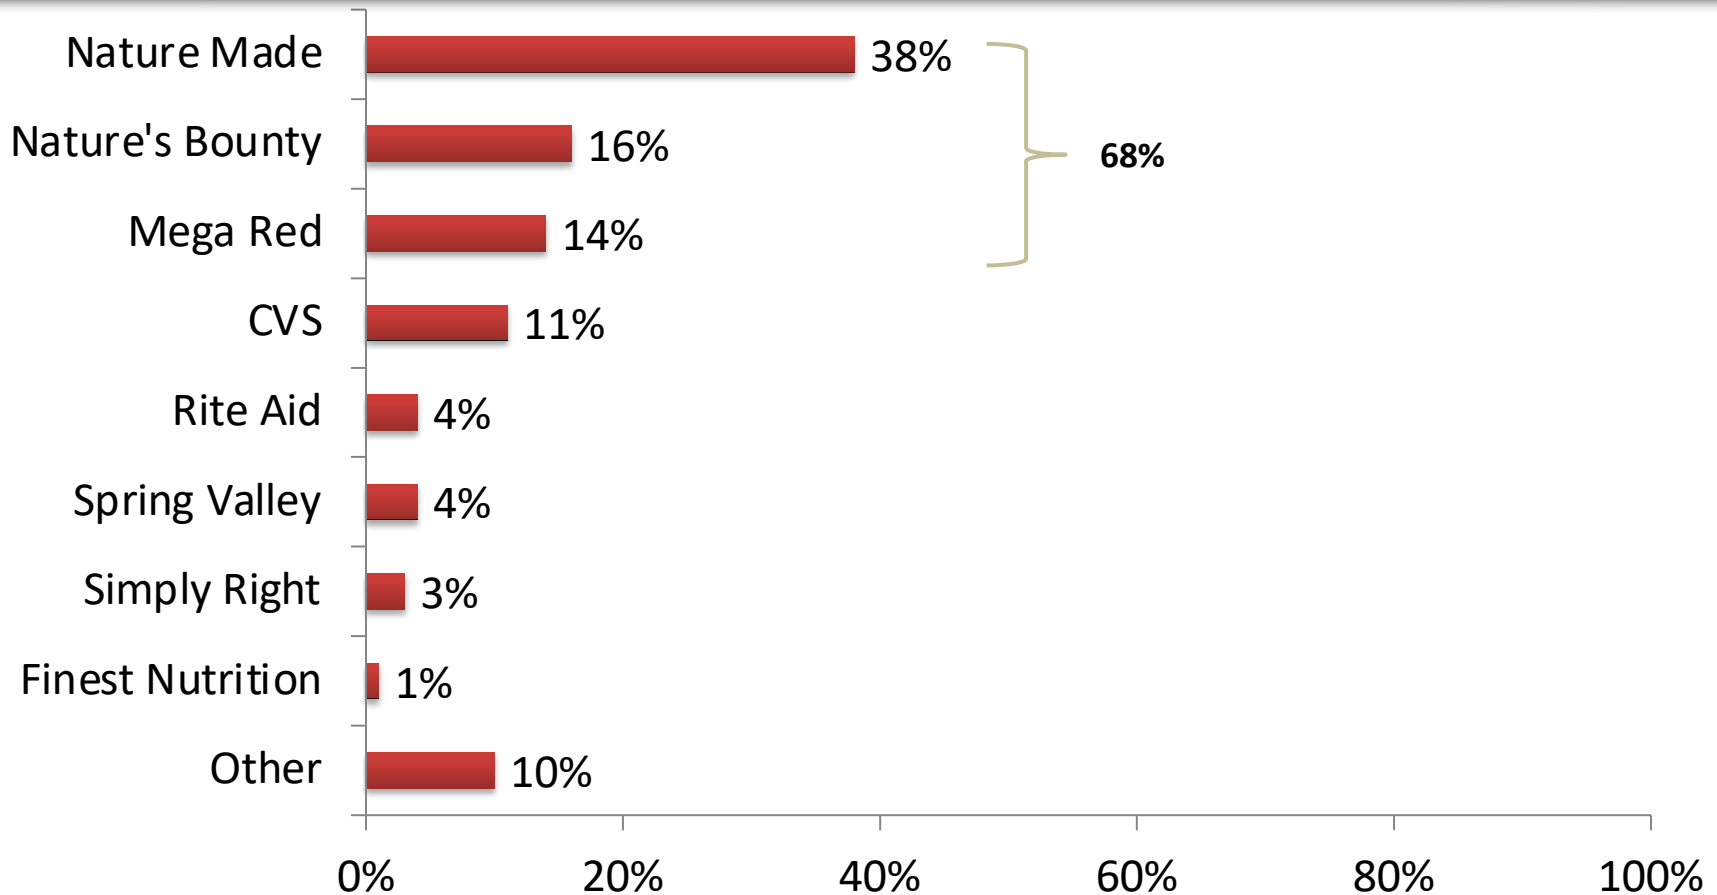

The Appendix contains a list of all 27 claims tested.

Respondents also ranked the claims within each group based on purchase motivation. Results for the ranking task mirror the results of the ratings. As such, the ranking results are provided in the data tables but not reported here.

Brand Of Fish Oil Supplement Purchased Most Often

Among Respondents

Nature Made, Nature's Bounty, and Mega Red brands account for 68% of use—with Nature Made accounting for over half of that usage.

Executive Summary

Executive Summary

Key Motivator- Heart Health

- Consumers buy and take fish oil supplements to protect their heart.
- Three of the Top Five claims relate to heart health.

Reason to believe- Omega-3 Levels

- Equally motivating as “heart health” and perceived to be slightly more unique
- “Clinically proven” and “3 X better” would enhance the credibility of this claim.

Fishy Burps

- Fishy burps, while mentioned by consumers as a downside of taking fish oil supplements, do not reach the Top Five in terms of claims motivation.
- Fishy burps appear to be an accepted nuisance of the category; reducing them is seen as a positive but other claims produce greater purchase motivation.

Executive Summary

All of these top claims do particularly well among Mega Red most-often users*. This suggests that Mega Red's share will be eroded more so than other brands' shown here by a fish oil supplement positioned with one of the Top Five claims.

Shown later in the report, Mega Red customers are motivated to try a competitive (store brand) based on the positioning of better Omega-3 levels at a fraction of the cost.

This suggests an overall weakness in Mega Red's positioning—possibly due to issues of price.

* Note: There were only 55 Mega Red Most Often Users in our sample—consider this finding directional in nature.

Top Five Claims: Motivation To Buy, Believability, and Uniqueness

	Definitely + Probably Would Motivate Me To Buy					Very + Extremely Believable Benefit					Very + Extremely Unique Benefit

MR = Mega Red

Fish Oil Supplement – Desired Changes

It is not surprising that “Nothing” was the most popular response given the high levels of satisfaction seen above.

What is a bit unexpected is the lack of specific mentions of Fishy Burps. It is possible that some of the Taste/Smell responses had their root in fishy burps.

	Total	BRAND MOST OFTEN USED			
		Nature Made	Nature's Bounty	Mega Red	All Others
	400	150	64	55	131
		(A)	(B)	(C)	(D)
Would not change anything	42%	37%	52%	42%	42%
Taste	13%	13%	9%	16%	13%
Aftertaste	8%	10%	9%	7%	6%
Make pill smaller	12%	13%	11%	5%	14%
Lower cost	9%	10%	6%	13%	8%
Smell	7%	9% D	5%	11% D	3%
Fishy burps	2%	3%	2%	2%	0%

Desired Changes

(select verbatims)

- *I don't like the after taste it gives me if I burp. It makes me burp and then it tastes really bad.*
- *I think the fish oil really does a good job I just don't like the fishy after taste especially because I don't even like the taste of fish at all*
- *The horrible taste it has if you leave it in your mouth too long.*
- *The smell. Sometimes it makes it hard to take after I've caught a wiff of the super fishy smell it gives off.*
- *I would like to have 1000mg of Omega 3 in one capsule.*
- *I get an after taste and would like it not to taste bad*
- *make pill smaller or chewable or gummy*
- *Most Fish Oil supplements are very large and not easy to swallow, possibly make them smaller for an easier dosage.*
- *Size. Instead of big pills, make them half sized with double quantity so I can take two small pills vs. one large one.*

Recommendations

The claim with most appeal would be:

- Promote the heart-health benefit of the product.
- Support for this positioning can be the levels of Omega-3 the product provides.

Price Differential

- Encourage customers to compare and save.
- Mega Red customers are motivated to buy this concept and seem particularly receptive to a reduced price (vs. Mega Red) message.

It is unclear what price differential consumers are expecting vs. Mega Red.

- Consumer testing the product interest (vs. Mega Red) at various price points might provide useful information in this area.

Detailed Findings

The Concept

During the course of the survey, respondents were shown the following new product concept which formed the basis for all of the survey responses:

New Product Concept Statement:

This *new product* is the first and only fish oil supplement clinically proven:

- To be absorbed by the body
- To increase your important Omega-3 levels
- To control fishy burps

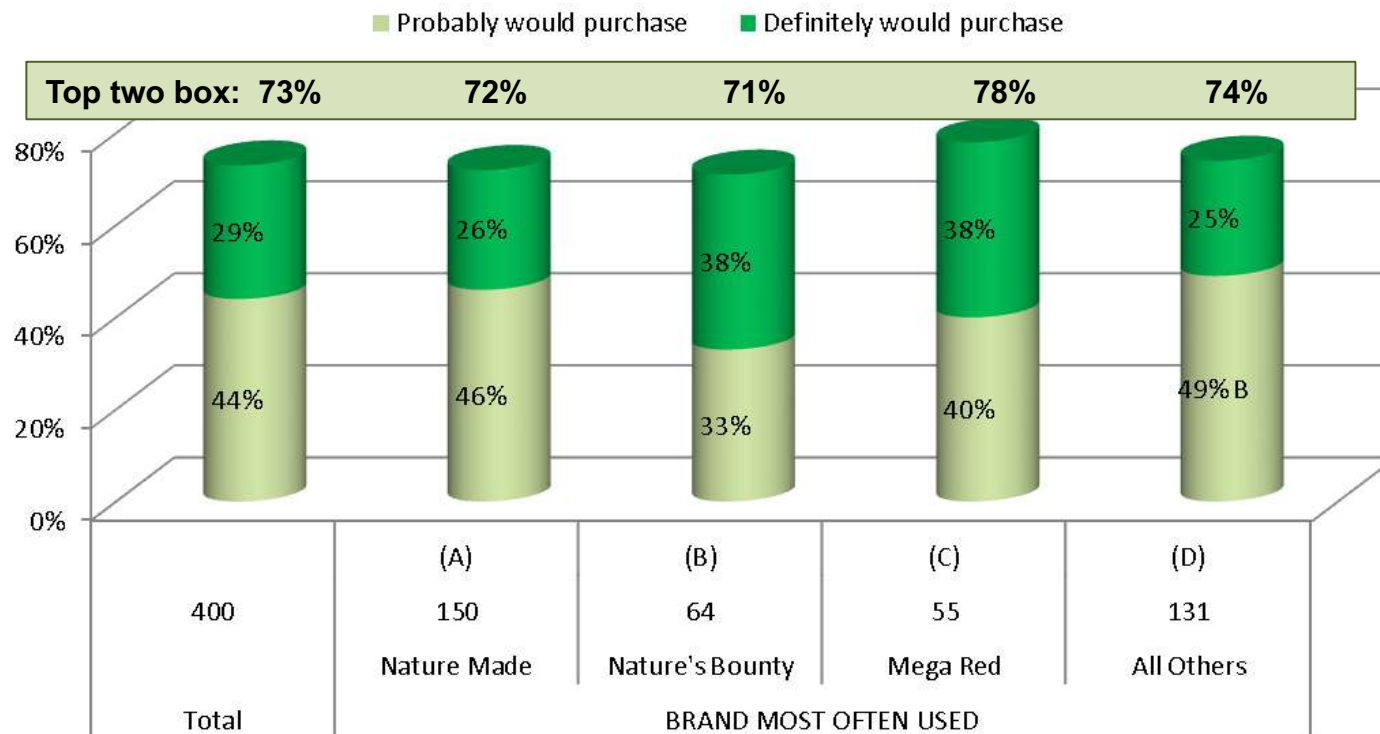

This *new product* uses a unique enteric softgel technology designed to maximize absorption, while protecting the digestive track from fishy burps 3x better than regular fish oil products.

These softgels are clear and 100% all-natural.

Also, these fish oil softgels provide 3x the Omega-3 levels versus MegaRed krill oil, at just a fraction of the cost.

Purchase Intent For Store Brand Fish Oil Softgel

Purchase Intent for the Concept (provided as a store brand) was good, as the definitely buy among the total sample was around 30%. Interest was highest among those who purchase Mega Red most often.

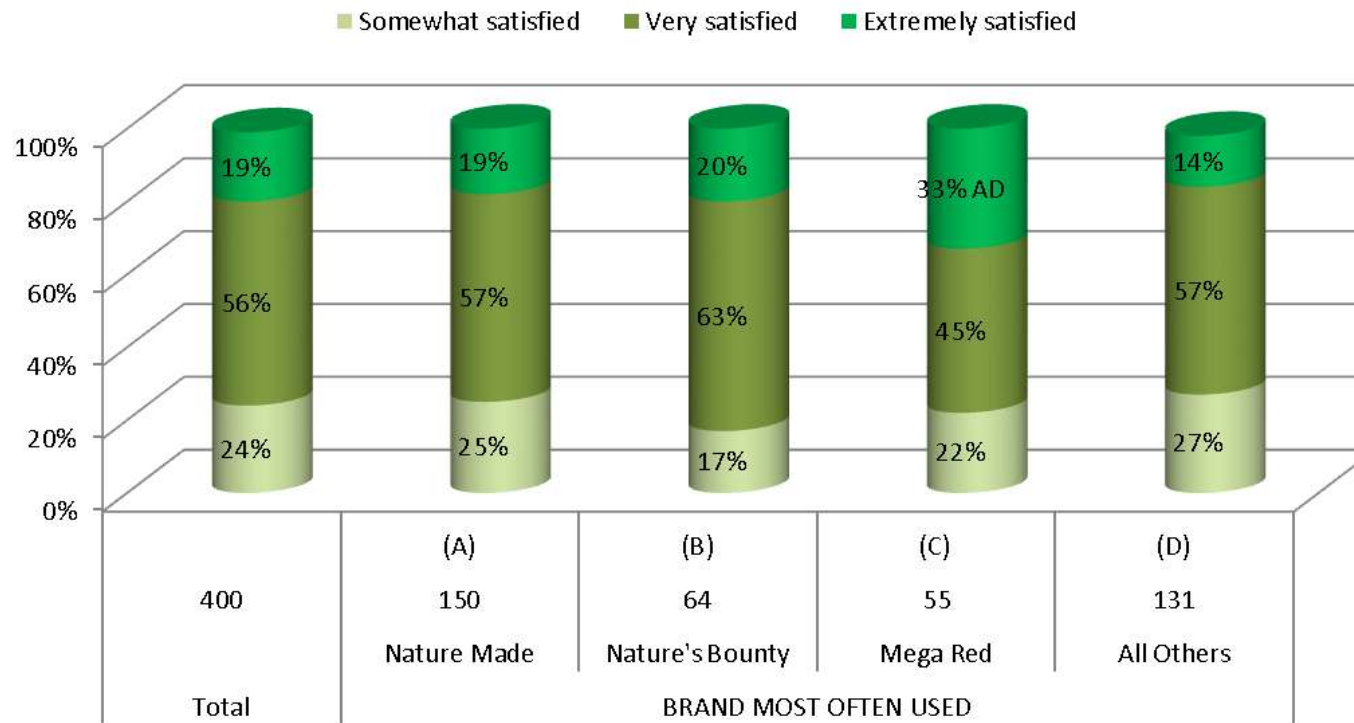

What Seems To Be Driving Purchase Intent For The Concept

While all five claims drive Purchase Intent to some degree, “Clinically proven to increase Omega-3 levels” has the greatest impact on purchase intent for Total Sample and the key brands shown below.

	Total Sample (n = 400)	Uses Nature Made Most Often (n = 150)	Uses Mega Red Most Often (n = 55)
Clinically proven absorption	71%	70%	76%
Clinically proven to control fishy burps	75%	67%	80%
Clinically proven to increase Omega-3 levels	81%	78%	91%
Provides 3X the Omega-3 levels vs. MegaRed krill oil	79%	69%	93%
Provides enteric protection in clear, 100% natural softgel	69%	66%	72%

Satisfaction With Brand Used Most Often

Consumers are highly satisfied with their current brand.

Reasons for Satisfaction

Consumers see that their brand provides both benefits and drawbacks.

Nature Made

- *The smell is pretty bad, and I am not sure if it gives me all the benefits it would*
- *I don't know if it's helping or not and it can make me feel sick sometimes*
- *does it's job, easy to swallow pills even though they are so large*
- *because I intentionally bought them to help with my hair and nails and that's what it did*

Mega Red

- *Out of all the fish oil supplements i've tried this one has the least amount of aftertaste*
- *My cholesterol has come down, it does not have the fishy taste I used to burp up when I took other fish oil supplements.*
- *It's a smaller pill and no after-taste*
- *easy to swallow, no fishy smell or aftertaste*
- *Gives me the amount of coverage I want - supply lasts 30 days.*

Nature's Bounty

- *as I said, a little smaller pill would be nice; less odor, less after taste*
- *No 'fish breath' which is nice. Okay price, but I'd like it to be less.*
- *Price, and availability are an additional plus to quality of ingredients and amounts per pill.*
- *it provides the dosage I want at an affordable price*
- *doesn't have a fishy smell or taste, I believe it helps my nervous system and metabolism.*

Product Benefits For Controlling Fishy Burps: Motivation To Buy, Believability, and Uniqueness

All four claims relating to controlling fishy burps have a strong level of purchase motivation. In terms of believability and uniqueness, “Clinically proven to control fishy burps 3x better than regular fish oil products” is the strongest claim.

	Definitely + Probably Would Motivate Me To Buy					Very + Extremely Believable Benefit					Very + Extremely Unique Benefit				
	Total	NM	NB	MR	All Other	Total	NM	NB	MR	All Other	Total	NM	NB	MR	All Other

Q.25 A New Fish Oil Softgel product provides the following benefits. Please tell us to what extent each benefit would motivate you to purchase this product.

Q.31 Using the same list of benefits, how believable is each benefit to you when purchasing the New Fish Oil Softgel product?

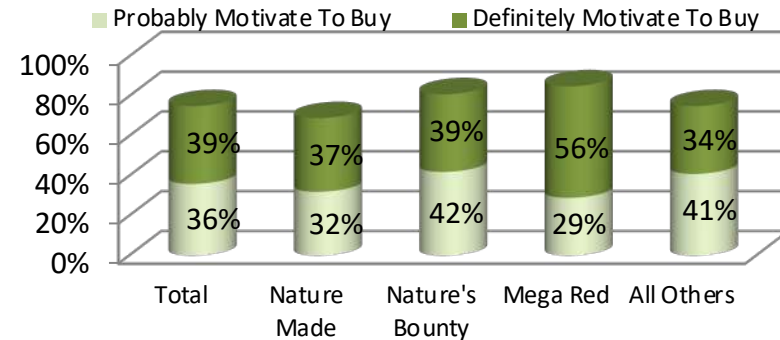

Q.33 How unique are each of the following benefits offered by this New Fish Oil Softgel product, compared to those offered by other Fish Oil supplement products?

Product Benefits For Controlling Fishy Burps: Motivation To Buy

New technology keeps fishy burps under control

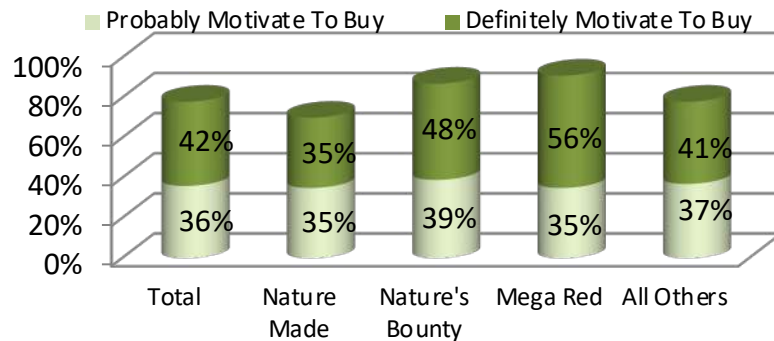

Clinically proven to control fishy burps

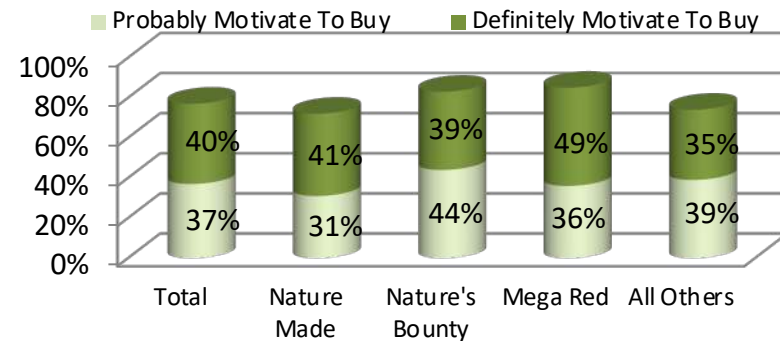

This benefit provides the greatest motivation to buy.

Clinically proven to control fishy burps 3x better than regular fish oil products

Only product clinically proven to control fishy burps

Reasons for Most Motivating Claim

“Clinically proven” was a strong cue to consumers that the claim could be trusted. It seems to transform the claim into a fact.

Clinically proven to control fishy burps 3x better than regular fish oil products

- Makes you think they actually did research and tested the product
- that is the problem with fish oil. It leaves fishy oil taste when you burp so if this controls it 3x better that is for me
- when you say things like clinically proven and 3x better it really strikes the message home that the fishy burps will be gone
- it was the only selection that was relative to something, everything else just made a claim that couldn't be supported.
- It sounds like it is statistically proven.
- because when you burp those fish oil capsules they really stink.
- It has been tested and I trust that as proof of assertion!
- It gives me facts and something that is clinically proven.
- when sited as any times more than 1 of any item its an attention grabber. 3x better is a motivator to buy
- Scientifically backed with numbers.
- It seems to control the burp problem better than other brands

Product Benefits For Absorption: Motivation To Buy, Believability, and Uniqueness

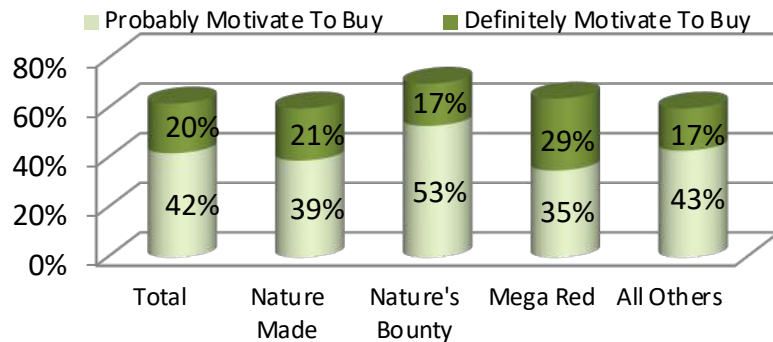

The claim “Clinically proven to significantly increase Omega-3 levels” provides the greatest purchase motivation, especially among Nature’s Bounty and Mega Red users.

Claims mentioning “Omega-3” tend to have a higher believability and uniqueness.

	Definitely + Probably Would Motivate Me To Buy					Very + Extremely Believable Benefit					Very + Extremely Unique Benefit				
	Total	NM	NB	MR	All Other	Total	NM	NB	MR	All Other	Total	NM	NB	MR	All Other
Clinically proven absorption	62%	60%	70%	64%	60%	47%	37%	48%	45%	56%	35%	32%	33%	38%	39%
Clinically proven absorption of vital Omega-3 nutrients	77%	74%	86%	82%	73%	56%	48%	59%	55%	62%	52%	51%	55%	59%	51%
→ Clinically proven to significantly increase Omega-3 levels	82%	79%	91%	92%	75%	57%	54%	59%	62%	55%	55%	56%	53%	58%	52%
Clinically proven to significantly improve “total Omega score”	75%	74%	86%	84%	67%	51%	44%	51%	56%	56%	54%	51%	48%	60%	57%
NM = Nature Made NB = Nature's bounty MR = Mega Red															

Product Benefits For Absorption: Motivation To Buy

Clinically proven absorption

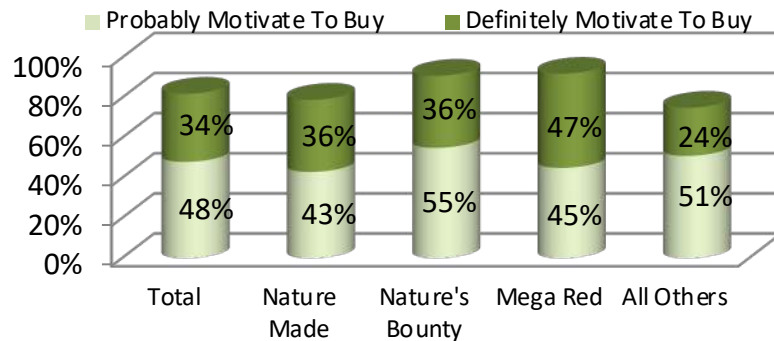

Clinically proven absorption of vital Omega-3 nutrients

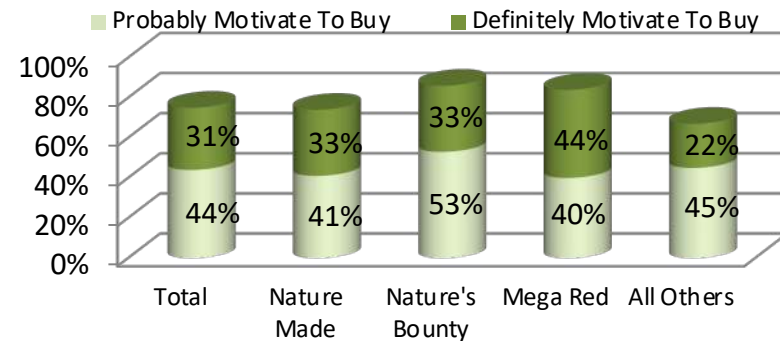

This benefit provides the greatest motivation to buy.

Clinically proven to significantly increase Omega-3 levels

Clinically proven to significantly improve "total Omega score"

Reasons for Most Motivating Claim

Again, we see that “clinical proof” provides consumers with a sense that the claim of increasing Omega-3 levels is true—a fact.

Clinically proven to significantly increase Omega-3 levels

- *omega-3 is why most take fish oil and clinically proven is strong statement*
- *implies it has gone through clinical testing and increased omega 3 levels in bloodstream is proof to me*
- *Increasing Omega-3 levels, in my opinion, is the number 1 reason I take the pills.*
- *because it says it will significantly increase my levels which would help with my health*
- *increasing omega 3 levels is suppose to be good for you*
- *It seems like it has been tested and proven to significantly increase Omega-3 levels*
- *That is the whole reason for taking the supplement, to increase Omega 3 levels*
- *Because I would like something that has been proven to be effective*

Product Features: Motivation To Buy, Believability, and Uniqueness

While the claim of “**only all-natural, clear softgel scientifically formulated to control fishy burps**” is among the top 2 claims in terms of motivation and uniqueness, it has only moderate believability.

	Definitely + Probably Would Motivate Me To Buy					Very + Extremely Believable Benefit					Very + Extremely Unique Benefit				
	Total	NM	NB	MR	All Other	Total	NM	NB	MR	All Other	Total	NM	NB	MR	All Other
Only all-natural softgel scientifically formulated to control fishy burps	73%	71%	78%	83%	67%	50%	46%	58%	53%	47%	52%	48%	58%	62%	48%
Only clear softgel scientifically formulated to control fishy burps	65%	63%	69%	77%	61%	48%	44%	50%	52%	49%	48%	40%	50%	58%	51%
➔ Only all-natural, clear softgel scientifically formulated to control fishy burps	74%	70%	86%	85%	66%	49%	51%	55%	47%	47%	53%	49%	53%	56%	54%

Once a day dosage	67%	67%	63%	73%	66%	71%	69%	79%	75%	70%	39%	38%	45%	34%	41%

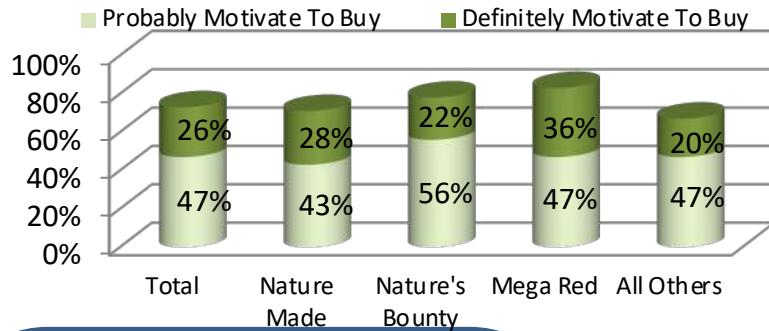

NM = Nature Made

NB = Nature's bounty

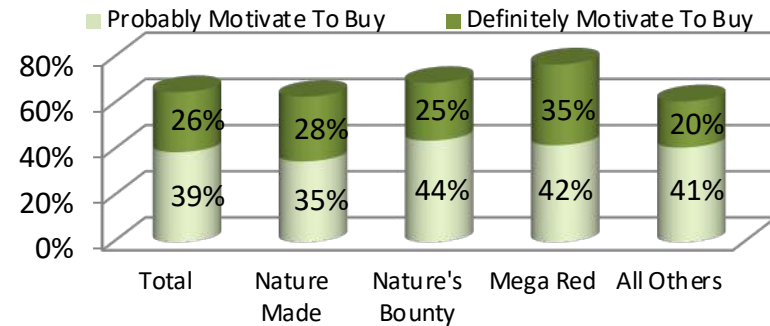

MR = Mega Red

Product Features: Motivation To Buy

Only all-natural softgel scientifically formulated to control fishy burps

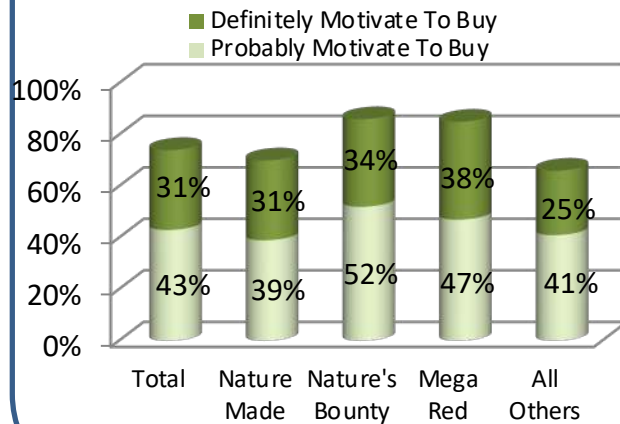

Only clear softgel scientifically formulated to control fishy burps

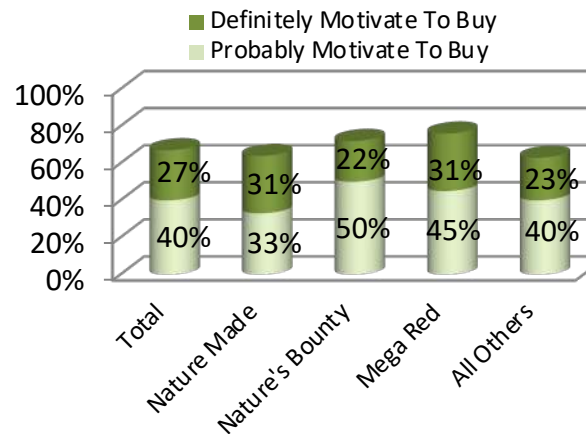

These features provide the greatest motivation to buy.

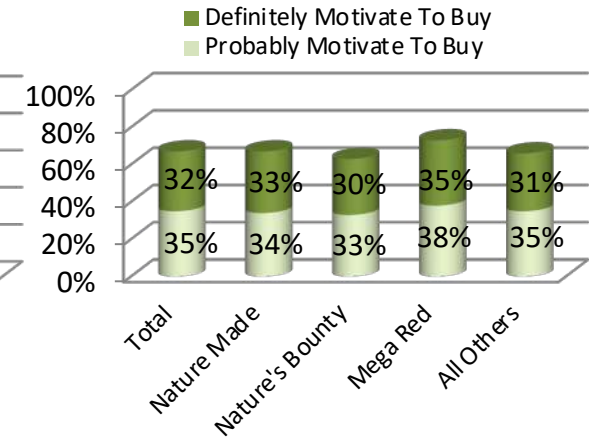

Only all-natural, clear softgel scientifically formulated to control fishy burps

Only all-natural, clear softgel that offers protection from fishy burps

Once a day dosage

Reasons for Most Motivating Claim

The combination of “natural” and “science” is strong. Consumers like the idea that the product is natural—but are reassured that there is some scientific support for it working.

Only all-natural, clear softgel scientifically formulated to control fishy burps

- *Because it was the most descriptive and sounded professional*
- *all-natural is a great choice of words and its catchy if it true and I like the clear aspect as well*
- *It sounds like it has science behind it, which stands out as a superior fish oil*
- *because the word Natural is in that sentence gives me a clear mind its all natural vitamin*
- *it's very important that it's a softgel because then you don't have to deal with the nasty taste*
- *I like to buy products that are natural and it is an advantage that it is scientifically formulated*
- *I like natural products*
- *If the statement tells that it is clinically proven and better than other product then it should do its work*
- *clear soft gel*
- *all natural and control is the best key words*
- *it's natural and sounds most like it actually does control them*
- *I like taking things that are all-natural*

Product Additional Benefits: Motivation To Buy, Believability, and Uniqueness

Claims relating to heart health are among the top motivators and the most believable. They are not, however, seen as being all that unique.

Clinically proven to control fishy burps

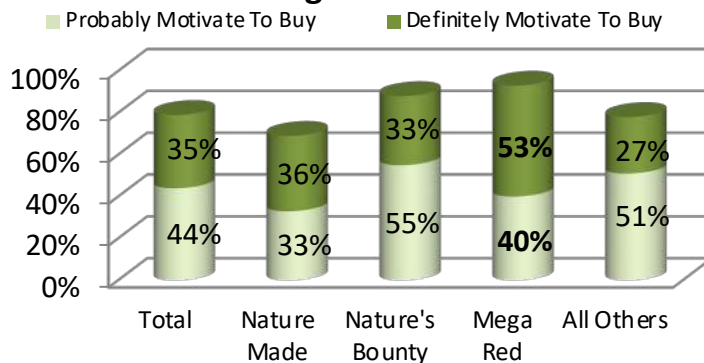

Clinically proven to increase Omega-3 levels

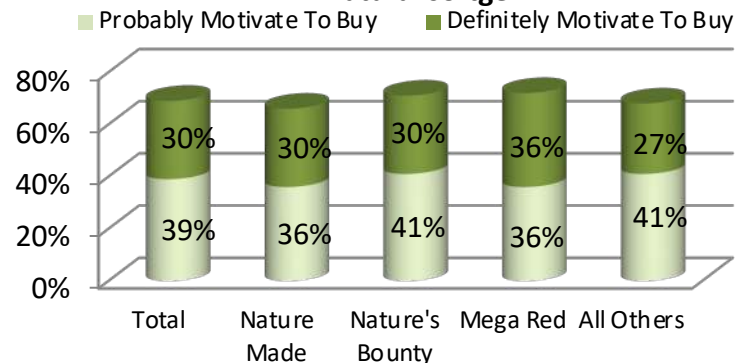

93% purchase motivation among Mega Red users

Provides 3x the Omega-3 levels versus Mega Red krill oil

Provides enteric protection in clear, 100% natural softgel

Appendix

Familiarity And Usage Of Fish Oil Supplement Brands

Nature Made enjoys the greatest overall use and positive feedback. While Nature's Bounty is not used as much as Nature Made, it has a greater potential for resurgent sales due to positive feelings from past use. Drugstore brands show indications of positioning issues—having the highest proportion of consumers who are aware of the respective brands but have never used it..

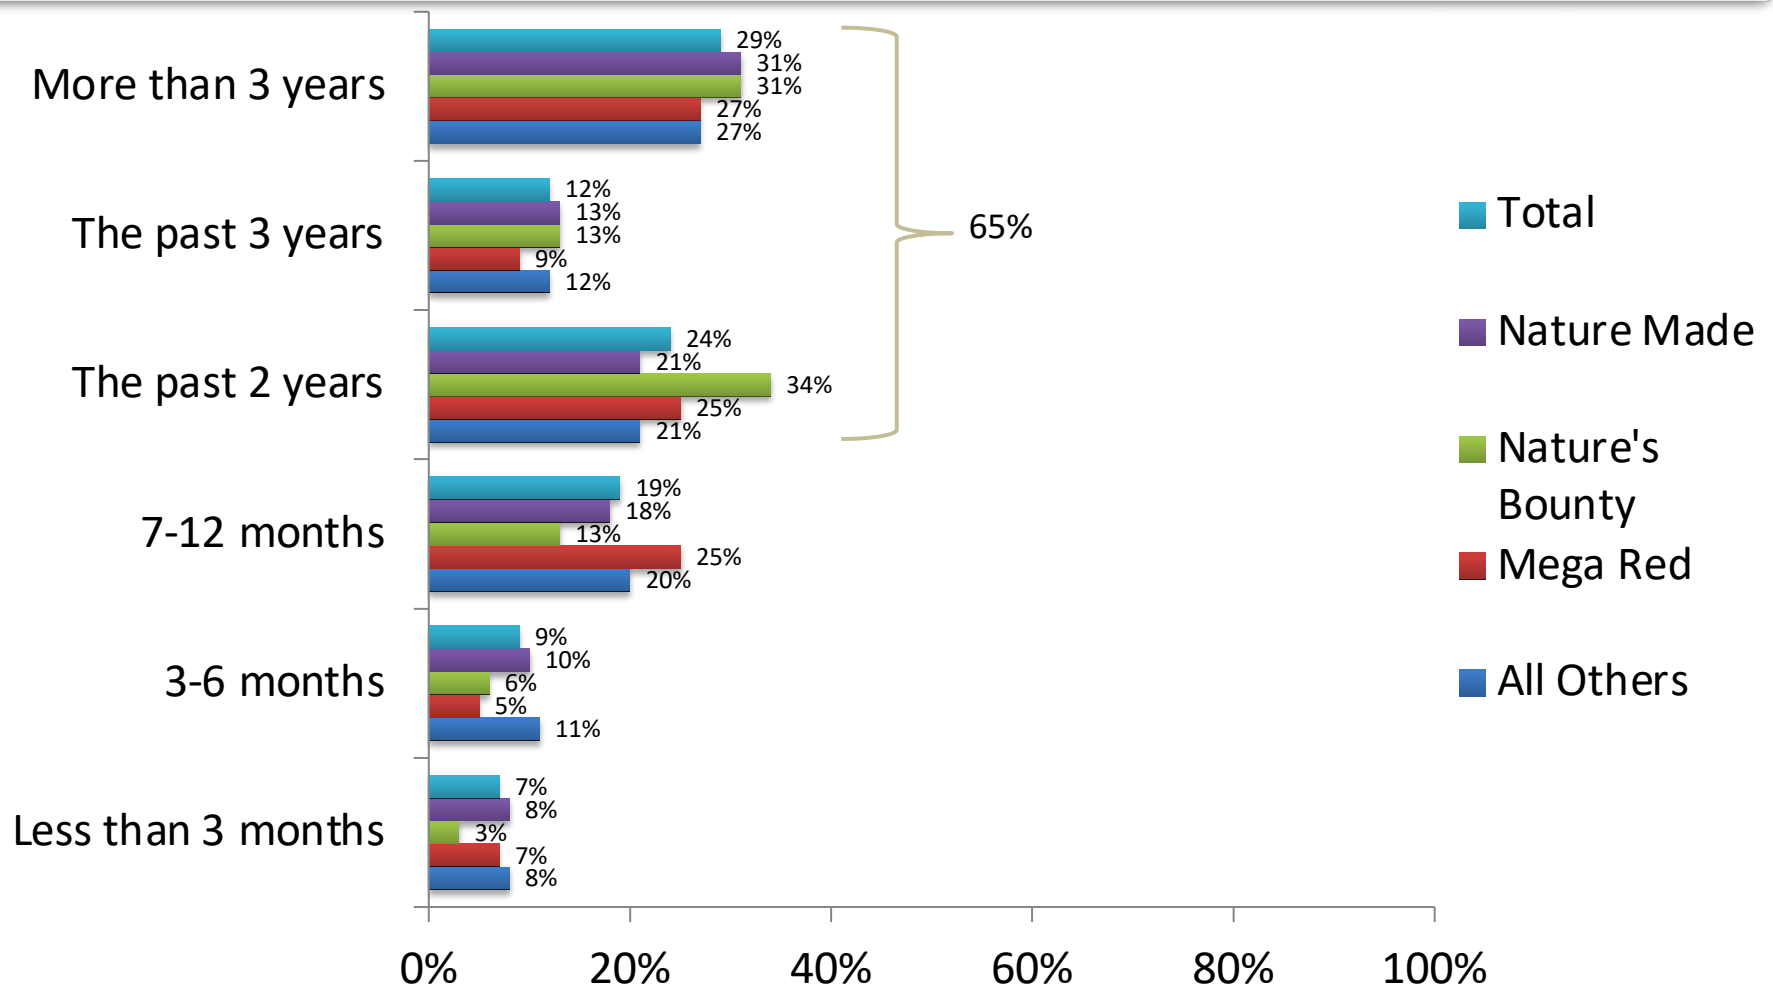

Brand	Brand TYPICALLY use	Have USED in the past and WOULD USE again	USED in the past, but WOULD NOT use again	Heard of, but NEVER USED it	Never heard of
