

Banner Labs Entericare fish oil softgel technology

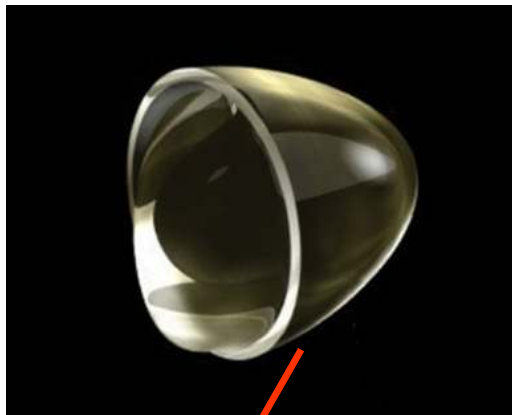

Technology description

Patented EnteriCare®/EnteriClear™ technology

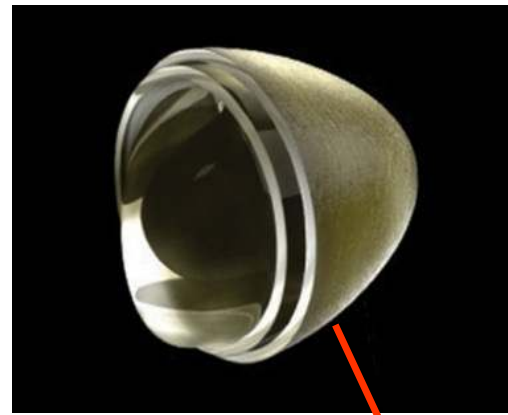

Enteric properties are built into the gelatin shell using pectin.

EnteriCare®/EnteriClear™

Builds enteric properties into the gelatin shell.

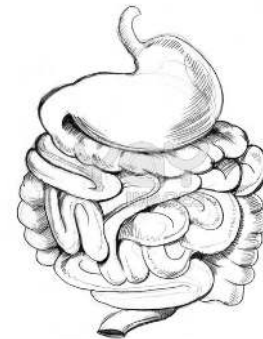

Other enteric coated fish oils

Use a methacrylic copolymer spray coating at end of process.

Protects Against Fishy Burps

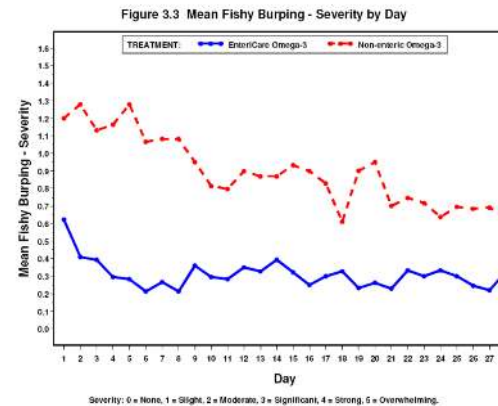

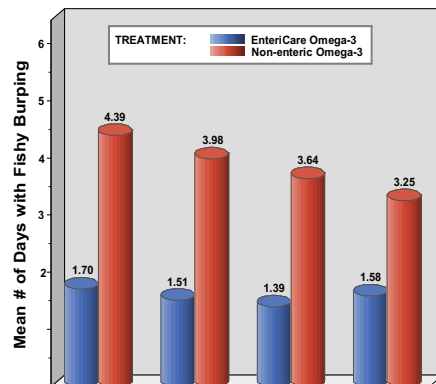

- #1 consumer complaint – and reason for discontinued use – is fishy burps.
- EnteriCare® technology delays dissolution from stomach to small intestine to reduce fishy burps.

Claims: Clinically Proven...

To Control* Fishy Burps

- EnteriCare® is the **Only Fish Oil Clinically Proven** to control* fishy burps.
- EnteriCare® offers **3x the fishy burp protection** versus non-enteric fish oil supplements.

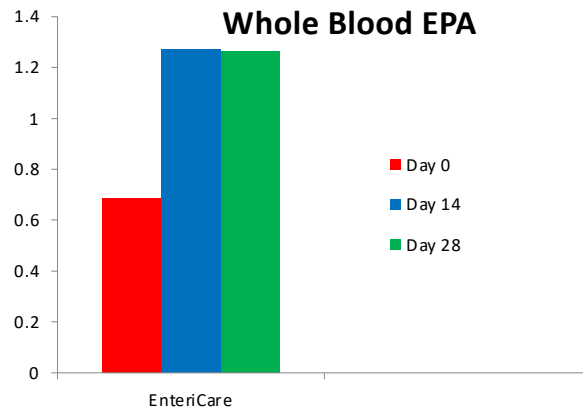

*EnteriCare® fish oil capsules have significantly lower levels of severity and frequency of fishy burps based on manufacturer's clinical trial comparing the highest concentrate of EnteriCare® fish oil to non-enteric fish oil.

Claims: Clinically Proven...

Absorption and "Efficacy"

- EnteriCare® has ***clinically proven Omega 3 absorption.***
- EnteriCare is ***clinically proven to significantly increase your Omega 3 levels.***
